

# Stem Research Scholarship Proposal

By Breonna Hall

# Technologies Impact on Climate Change

- Positive vs Negative
- Increasing amount of technology
- Leading to more burning of Fossil Fuels
- Finding more renewable forms of energy to support technology

# Climate Change

- Global Warming (climate change) no longer a theory
- Several contributing factors to climate change
- Is technology increasing or decreasing climate change ?

# Plan of Study

- Amount of people who have technology
- Users of technology on a daily basis
- Amount of technology produced on a regular basis
